

TOM M. DOBSON

EXPERIENCE

Analytics Consultant

The Information Lab (TIL)

Apr 2022 – Present

London

- Worked as a consultant for two and a half years at a leading data analytics firm, specialising in SQL, Tableau, Python, Power BI, and Alteryx
- Consulted with major clients such as Inmarsat, IAG Cargo, and the BBC, as detailed below
- Designed and implemented automations using Python, SQL, and GitHub Actions to detect online User Group events and post alerts to an internal network
- Automated a process to detect new client opportunities in Notion and generate supporting documentation, directly saving **0.25 FTE** and eliminating human error

Consultant via TIL

Inmarsat

Jan 2024 – Present

London

- Designed and implemented a revenue protection system using SQL and Tableau to flag contracts nearing their end-of-commitment date, exposing **£2.9m** in annualised revenue at risk by April 2024
- Created SQL queries to consolidate and standardise product performance data from over ten tables into a single source of truth. Designed a Tableau interface to alert the business to performance changes and source table issues, resulting in significant time savings
- Developed SQL code to migrate ETL pipelines from Alteryx to GCP, including complex workflows with iteration and scaffolding, enhancing data delivery reliability and performance
- Version-controlled code using Git to ensure robust collaboration, code management, and change tracking
- Used Confluence to produce wikis and technical documentation, simplifying hand-over of assets, future development, and troubleshooting

Advanced Analytics & Reporting Analyst

Consultant via TIL

IAG Cargo

Feb 2023 – Aug 2023

London

- Developed and productionised SQL procedures and a Tableau front end to intelligently distribute warehouse tasks based on resource availability and task complexity, directly saving **1 FTE** and enabling a headcount reduction
- Designed and deployed an automated system using SQL to expose **£98k** in incorrectly declared cargo in 2023, enabling the recuperation of lost revenue via automated incident reporting through BusinessObjects
- Performed a full audit of an undocumented database to evaluate its potential for operational performance monitoring and presented findings to senior stakeholders
- Re-engineered an Oracle database schema to eliminate errors when calculating business-critical flight performance metrics, tested changes in parallel, and oversaw migration to the new design

Tableau & Alteryx Consultant

Consultant via TIL

British Broadcasting Corporation (BBC)

Jul 2022 – Jan 2023

London

- Designed and implemented data pipelines in Alteryx to clean and combine over six million rows of survey data. Created an accompanying Tableau front end to consolidate this information into a single source of truth
- Automated the production and delivery of daily reports on high-performing news stories for senior stakeholders using Alteryx
